

Would you like to Internationalise your Life Science Business and access new European Markets?

The new **Boost4Health (B4H)** project is part funded by the Interreg 5B North West Europe programme and will support **Kent-based Life Science companies** with internationalisation and in particular market entry into mainland Europe. The project will formally link Kent's new BioGateway cluster to various European Life Science clusters in the Netherlands, Spain, Belgium, France, Germany and Denmark. B4H will run from 2016 to 2019.

Who can take part in the B4H project?

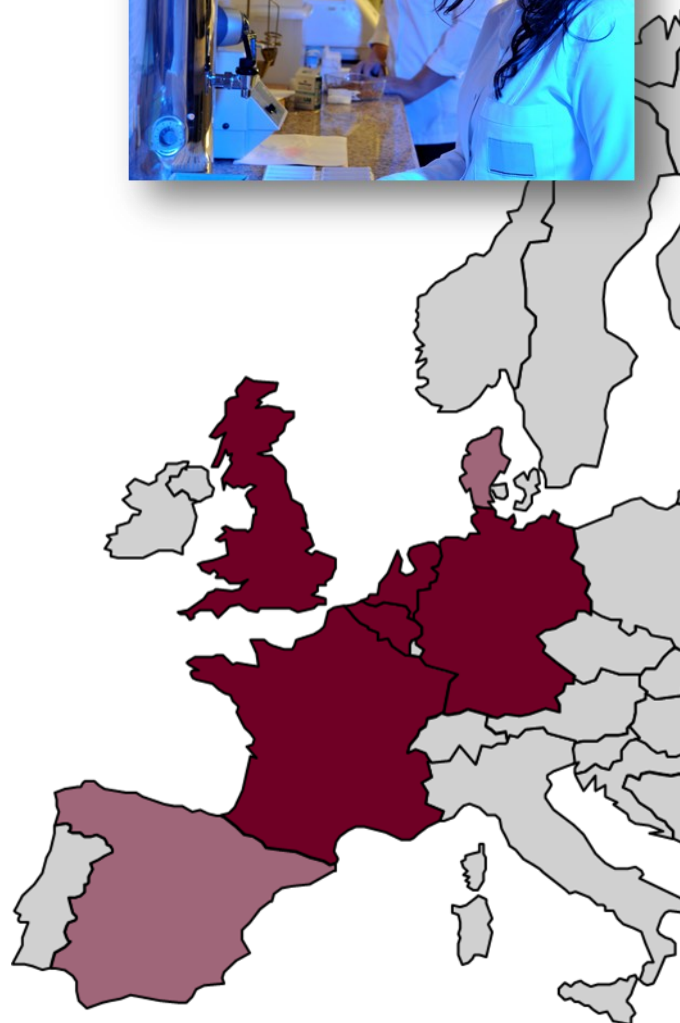

Kent Life Science SMEs which would like to explore new approaches and internationalise their business.

Why participate?

- Internationalise your business and become part of a thriving European Life Science network
- Receive practical & financial support to help with international trade in mainland Europe
- Take part in international collaborations and partnering to help your business access new commercial opportunities

What can you expect?

- Take part in an international business growth coaching programme
- Be part of a product validation network
- Take part in international Life Science clustering activities
- Receive micro-financing for growth acceleration & international collaborations
